

MANUFACTURER WARRANTY POLICY FOR LEASE OF THE MNAV 750

24 MONTH MNAV RETURN TO BASE MANUFACTURERS WARRANTY:

The Navman MNav 750 is covered as standard by an initial 24 month return to base manufacturer hardware warranty. The faulty unit should be returned to Navman at the customer's expense via a reputable courier with proof of delivery. Before sending it back, a returns number should be obtained from Navman and enclosed with the return. Should the failure be due to a hardware fault then the faulty hardware will be replaced and sent back to the customer at Navman's expense. The failed hardware will not be returned to the customer. Wiring faults associated with the installation are NOT covered (these are covered by the warranty attached to the Halo/Qube/Qube2/Qube3 device).

This warranty does NOT cover physical damage, either accidental or malicious. The MNav 750 is insured and the extent of the cover is in the insurance documentation.

MNav750: £390
